SIMONE CERVINI

Milano, MI | simonecervini99@gmail.com | cervini.github.io

Software Engineer | Microservices & System Design. Computer Engineering graduate (Politecnico di Milano) with over a year of professional experience designing and building full-stack prototypes for an enterprise IoT platform, presented to major Italian clients, and a Java/Spring microservices-based digital payments pilot. Comfortable across the stack, from React and MQTT-connected backends to FPGA design in VHDL. Looking for a software engineering role on backend and distributed systems.

SKILLS

Languages: Java, JavaScript, Python, C, SQL, VHDL, HTML, CSS
Backend & architecture: Spring, microservices, REST APIs, MQTT, Thymeleaf, Firebase
Frontend: React
Tools: Git, Docker

WORK EXPERIENCE

BUSINESS ARCHITECTURE ANALYST ACCENTURE
OCTOBER 2026 – PRESENT · APPRENTICESHIP

Developing an internal pilot, based on a microservices architecture, for a digital payments platform serving payment service providers (PSPs).

Implemented in Java/Spring a domain microservice and part of the platform's internal SDK. The pilot later became the base for a confidential internal project.

BUSINESS ANALYST ACCENTURE
OCTOBER 2025 – SEPTEMBER 2026 · INTERNSHIP

Designed, built and delivered five proofs of concept for an enterprise IoT platform over about 10 months, in a team of two covering the full stack: React frontend, backend in a proprietary JavaScript-based language, APIs, MQTT connections, database and WebMCP integrations.

Defined the technical architecture of each proof of concept and presented them to major Italian clients in the transport, banking and energy sectors.

Started the development of the internal digital payments pilot.

MATHS TEACHER IIS FALCONE-RIGHI
JANUARY 2022 – MAY 2022

Organization, planning and delivery of teaching for five high school classes.

EDUCATION

POLITECNICO DI MILANO, CAMPUS LEONARDO
BACHELOR'S DEGREE IN COMPUTER ENGINEERING · 2025
Among the courses covered: Logic Networks, Databases, Algorithms, Software Engineering, Transmission Devices, Computer Architecture and Operating Systems, Electronics and Electrical Engineering.

IIS FALCONE-RIGHI, CORSICO
HIGH SCHOOL DIPLOMA IN COMPUTER SCIENCE

PROJECTS

DIFFERENTIAL FILTER in VHDL
Design of a complex synthesizable component on FPGA, description in VHDL and creation of test benches for testing.

REINVENTORY in JavaScript (React 19), Firebase, Firestore, @dnd-kit
Design, development, and distribution of a web app to support TTRPG campaigns.

DOWNLOAD ORGANIZER in Python
Development of a tool that reorganizes the Downloads folder in the background according to customizable rules.

ERYANTIS in Java
Team design and development of the digital version of the board game Eryantis.
